

# Kirkwood College Roundabout Enhancement

*Cedar Rapids, Iowa*

## Project Description:

Kirkwood Community College requested Hall & Hall Engineers to create a unique and meaningful gateway design feature for their Linn County campus. The project site incorporated a collection of integrated retaining walls with landforms, sculpture, plants and flag poles working harmoniously together.

The innovative wall design emulates mechanical gears and sprockets, capturing the essence of Kirkwood Community College 's beginning as an educational institution. Technology and agriculture, in the past and still today, are integral parts of the Kirkwoods legacy.

## Services Provided:

- Landscape Architecture
- Bidding & Construction Services
- Construction Staking
- Monument Signage Layout & Design
- Theme Development
- Detailed Site Grading

## Status:

Completed in 2012

## Project Type:

Municipal Streetscape Development
