

# 76th Street Improvements

*Cedar Rapids, Iowa*

## Project Description:

76th Street is a two-lane minor arterial in the heart of the College Community School District campus. The project included a street reconstruction and widening to accommodate a center turn lane/median along approximately 2,100 LF of this street, new right turn lane at an adjacent intersection, pedestrian facility improvements, and parking lot modifications/expansion for the adjacent school. The rural roadway pavement section was converted to an urban roadway with curb and gutter and new storm sewers. Hall & Hall Engineers worked closely with City and school staff to develop a detailed construction staging plan and incentive program to help minimize the duration of construction on this project and inconveniences to school traffic.

## Project Features:

- Joint project with College Community School District and the City of Cedar Rapids
- Numerous construction milestone dates and incentives to reduce impacts to school access

## Status:

Designed October 2013 with construction commencement in Spring/Summer of 2014 at a bid price of \$1,315,000
